## Off – Road Driving

**Quad Bikes** - Test your skill & co-ordination riding one of our robust four wheel all terrain vehicles over a simple but challenging obstacle course, consisting of a jump, seesaw, limbo, & slalom. The competition winner will have mastered the skills necessary to complete a penalty free round.

**Powerturn** - A completely new type of vehicle providing maximum fun with maximum safety. Two drivers each controlling the speed of a wheel will have to negotiate themselves around a slalom course & on completion park in the garage.

**Blindfold Driving** - Drivers must negotiate a simple course in a 4 x 4 Land Rover. Well it would be simple if the driver were not wearing a blindfold. Communication & directions are given from the rest of the team via two-way radio.

**Reverse Steer** - This vehicle will do the opposite to what you would expect. Turn the steering left & the car will go right. Turn the steering right & the car will go left.

**Honda Pilots** - These exhilarating 400cc American Dune Buggies are always a popular choice. Although we won't be racing in the Californian deserts, this event will give all drivers a chance to feel like a racing driver with individual time laps & team relays. The best vehicle of its type on the market has proven itself to be an adrenaline pumping activity.

**Argocats** - These six-wheeled six wheel drive vehicles have been specially developed for use on rough country terrain. Our testing course, which includes slaloms, gates, & a roundabout, must be negotiated without the aid of a steering wheel, since these machines have lever steering similar to that of a tank.

**Hovercraft** - Most people have never driven a hovercraft before, and because it is very different to driving a car or a boat it provides a unique opportunity to learn a new skill and put those new skills into practise. Remember to keep your weight forward in the corners to balance the weight of your hovercraft and remember to never let go of the throttle when you are travelling sideways.

**Karting** - Outdoor racing is as real as it gets. Adjust your driving to match the conditions, whether dry, damp or wet. We hold a range of different karting events, all designed to give you a true taste of real motorsport in a safe, friendly environment.

## **Tank Driving Day**

**Grozdilka** - Big Russian tank, powered with a turbo charged V8. The best fun drive you'll ever have and much bigger than the British or American equivalent.

**Lance and Hagglund Lance missile supply vehicle** - American built amphibious tracked craft. This vehicle is very smooth and responsive to drive.

**SAS Skills and woodland patrol** - Learn the secrets of the SAS by a genuine ex SAS soldier then use your new skills when you try and cross his jungle.

## **Monster Mash**

The Fat Landy Monster truck is a unique concept in both the worlds of monster trucks & activity experiences. Being the only one of her kind in the world an encounter with the Fat Landy is one you will never forget.

This uniqueness provides endless amazement & amusement for everyone. She attracts crowds, holds their interest and imagination wherever she goes, which makes her ideal for hiring as a static display at a venue of your choice.

The Fat Landy is British built & with her unusual drive system & innovative design the Truck Specs will endlessly capture & inspire the more technical mind.

## **Rally Driving Experience**

A half day course designed to provide a fun and exciting introduction to the sport of rally driving. The course begins with an informal tutorial in our classroom area where your instructor will brief you on the basic principles of rally driving, including power sliding and handbrake turns. Following the tutorial session, you will take the co-driver's seat for a brief in car demonstration of the subjects covered in the classroom.

Then it's your turn behind the wheel and a chance to put into practice the tuition you have received so far.

Each customer has three practical driving sessions in our safe practice area, learning the techniques used by modern day rally drivers.
